

MindShift — Enforcement Checklist v4

SECTION 1 — ENFORCEMENT (MUST PASS)

- ☐ Deploy without AEO → FAILS
- ☐ Deploy with EXPIRED authority → FAILS
- ☐ Replay same decision_id → FAILS
- ☐ Modify payload after validation → FAILS
- ☐ Skip proof step → FAILS

Condition:

If any passes → system NOT enforced

SECTION 2 — BOUNDARY LOCK

- ☐ No manual deploy triggers
- ☐ No alternate workflows
- ☐ No direct API deploy paths
- ☐ GitHub main branch protected
- ☐ Required status check: mindshift-validate

Condition:

deploy_without_MindShift = impossible

SECTION 3 — AUTHORITY INTEGRITY

- ☐ decision_id required
- ☐ status == ACTIVE at validation
- ☐ transitions to CONSUMED after execution
- ☐ replay attempts blocked

SECTION 4 — EXACT OBJECT DISCIPLINE

- ☐ validated_object_hash exists
- ☐ execution_payload_hash exists
- ☐ hashes match exactly

Condition:

mismatch → BLOCK

SECTION 5 — PROOF

- ☐ run_id captured
- ☐ commit_sha captured
- ☐ environment_url captured
- ☐ proof stored via /proof

Condition:

no proof → INVALID execution

SECTION 6 — PERSISTENCE

- ☐ authority stored
- ☐ validation stored
- ☐ execution stored
- ☐ proof stored

System of record:

D1 (or equivalent)

SECTION 7 — COMPLETION CONDITION

- ☐ bypass_paths = 0

[] deploy_without_MindShift = impossible

FINAL STATE

boundary = unavoidable

execution = governed

system = infrastructure
